Boeing 737 800 Standard Operations

The 737 is Boeing's only narrow-body airliner in production, with the -600, -700, -800, and -900ER variants currently being built. A re-engine and redesigned version, the 737 MAX, is set to debut in 2017. Originally envisioned in 1964, the initial 737-100 flew in 1967 and entered airline service in February 1968.

Boeing: The Boeing Company

The firm order backlog for the 737 MAX models alone now stand at 3,550 airplanes, Boeing's data shows. Airbus cites the order backlog for its rival A320 family of jets at 6,108 airplanes.

Boeing has lost more than 800 orders for the 737 MAX this ...

In 1998, Boeing again heavily revised the 737, with the 600, 700, 800 and 900 variants, designated 'NG' (Next Generation). These aircraft featured FADEC controlled CFM56-7 high-bypass turbofan engines, larger and more efficient wings (without winglets in some cases), a strengthened fuselage, revised avionics, and a higher cruise speed.

X-Plane 11

All three 787s were delivered from Boeing's North Charleston, S.C., plant, not from the 787 line in Everett. Two were 787-10s for British Airways and the third was a 787-9 for Westjet of Canada. With the shrinking of the 737 Max order book, Boeing's official backlog now stands at 4,552 airplanes. The Airbus backlog stands at 7,584 airplanes.
