This handbook is not intended as a collection of "rules". Beyond the obvious, such as the cardinal sin of plagiarism, the dishonesty of fabrication or the immorality of bribe-taking, journalism is a profession that has to be governed by ethical guiding principles rather than by rigid rules. The former liberate, and lead to better journalism.

Investigative Journalism Manuals

Data journalism is the practice of using numbers and trends to tell a story. It requires a variety of skills: research to find the correct dataset, analysis to determine what kind of story this dataset may tell, and presentation to share that story with readers. And these skills are within reach for many science writers, even without any programming background, because science writers already ...
