The forklift itself is a hazard, but the load can be, too. Train operators and other workers to stack and secure the load so that it will not shift during transport. When the forklift is in motion, the load should be carried as close to the ground as possible. Unlimited employee safety (and HR) training—one low cost.

Forklifts: 7 Tips for Keeping Workers Safe - EHS Daily Advisor

The rate of nonfatal workplace injuries and illnesses has declined from 10.9 cases per 100 full-time employees in 1972 to 2.8 cases in 2018, the Labor Department's Bureau of Labor Statistics (BLS) noted in its monthly publication, Beyond the Numbers.
