A frog is any member of a diverse and largely carnivorous group of short-bodied, tailless amphibians composing the order Anura (literally without tail in Ancient Greek). The oldest fossil "proto-frog" appeared in the early Triassic of Madagascar, but molecular clock dating suggests their origins may extend further

## **Frog - Wikipedia**

Toads have dry, rough and bumpy skin covering a wide body while frogs are slender with smooth, moist skin. Frog eyes are higher on the head than toads and are rounder and bulging. And there's a reason we play "leap frog" -

# Read Free Frogs Toads Turtles Take Along Guide

frogs take long, high jumps but toads run or take small hops. Check out our fun fact sheet on Oregon's frogs and toads.
