Kappa are said to be about the size of a small child (never more than 5 feet tall) and have relatively small frames. In fact, the word 'Kappa' actually translates roughly to 'water child.' Their hands and feet are webbed and they are said to have amazing swimming capabilities. Kappa also have scaly skin, similar to that of a reptile.

### Kappa - River Demon in Japanese Folklore | Mythology.net

The weighted kappa coefficient is a generalization of the simple kappa coefficient that uses agreement weights to quantify the relative difference between categories (levels). By default, PROC SURVEYFREQ uses Cicchetti-Allison agreement weights to compute the weighted kappa coefficient; if you specify the WTKAPPA(WT=FC) option, the procedure ...
