Macroeconomic Theories of Inflation - IPEDR

The study of causes of inflation has probably given rise to one of the most significant macroeconomic debates in the field of economics. In practice; however, it is not always easy to decompose the observed inflation into its monetary, demand-pull, cost-push and structural components. The process is dynamic, and the shocks to prices are mixed.

[PDF] Macroeconomic Theories of Inflation | Semantic Scholar

Different economists have presented different theories on inflation. The economists who have provided the theories of inflation are broadly categorized into two labels, namely, monetarists and structuralists. Monetarists associated inflation to the monetary causes and suggested monetary measures to control it.

Major Theories in Macroeconomics | Boundless Economics

Inflation is a sustained, generalized increase in the prices of goods and services in an economy. Every increase in price is not inflation, though. When the prices of produce rise in the winter, we don't call this inflation, because prices will come back down in the spring. The price increase is not a sustained (or permanent) increase.
