Whoa. That is so cool. When I was a child I used to build model rockets and satellites. My parents bought me a paper back book that had paper templates inside which you were supposed to cut out and build into a model satellite. This is the coolest model building I've ever seen. I'm looking more into this right now. Let me know how you make out.

Try It At Home: Build your own satellite (paper model ...

Radar has made much of modern life possible, and if you're into building your own electronics building one is a fun and useful project. Watch this video for instructions on how to build your own simple radar out of cheap spare parts from a satellite dish or a toy radar gun.

Radar reflectors are simple devices that are used to make something more visible to radars. For example, kayakers in foggy areas use radar reflectors to avoid being run over by bigger boats (with the radars); weather balloons have reflectors that allow them to appear in Air Traffic Control radars, and so on.

Lightweight Radar Reflector : 8 Steps - Instructables

The template consists of 4 parts and comes with a paper jig that can be used to assemble the box in a neat way. The top and bottom parts are duplicated in the template. When they are cut out you are left with the jig plus 2 tops and 2 bottoms. You can destroy the spare top and bottom.
