Sapiens - a critical review - bethinking.org

In writing Homo Deus Prof. Harari has done his best to rely on the most up to date sources and the most accurate facts available. Yet as with any human endeavor, mistakes are inevitable. Despite the best efforts of Prof. Harari and his editors, the text unfortunately contains some factual errors that were discovered only after the book was published, and it was too late to correct them.

Homo Deus - Yuval Noah Harari

Harari primarily presents an hypothesis as to how Homo sapiens who successfully migrated out of Africa circa 70 kya (thousand years ago) and thereafter, successfully dominating the planet, differed from earlier Homo sapiens who attempted out migration previously (e.g. around 130 kya) but were not successful.

About 70,000 years ago, Homo sapiens underwent a “cognitive revolution,” Harari writes, which gave them the edge over their rivals to spread from East Africa across the planet. Other species had big brains too, but what made Homo sapiens so successful is that we are the only animals who are capable of large-scale cooperation.
