Sink or float? : thought problems in math and physics ...

The science behind the sink or float experiment Before explaining why items sink or float, ask your children why they think an object sinks or floats. They may guess it's because of size or weight or construction. Then, explain that items sink or float based on their density.

Sink or Float Experiment for Toddlers and Preschoolers ...

It seems logical that bigger objects should sink while smaller objects float, but this isn't always true. Objects with tightly packed molecules are denser and sink. Objects with more loosely packed molecules are less dense and float. Whether an object sinks or floats depends on its density. Everything is made of molecules.

Facts About Sink and Float - Easy Science For Kids

What determines whether an object sinks or floats? Size or weight are easy guesses, but we know that large, heavy boats can successfully float across bodies of water, while smaller, lighter objects...

Sink or Float Science Experiment | Study.com

At this point, I handed out the paper below and asked students to predict if they thought the eight candies I'd preselected would sink or float in a cup of water. Click on the image above to download and print a customizable document.
