This Is How Your Brain Responds to Social Influence. By Shelly Fan - Aug 25, 2020. 0. I'm a doormat when it comes to peer pressure. Jump off a 32-foot (10 meter) diving board without any experience? Sure! Propel off a cliff my first time outdoor climbing? I'll try!

This Is How Your Brain Responds to Social Influence

The CEO of your brain is the prefrontal cortex. It is the top front portion of your brain and, though it may be smaller in size, it really runs the show. It is responsible for good decision making, impulse control, planning, and other complex functions befitting its executive position... and it's not fully

formed until the age of 25.

This is your Brain on Porn - Conquer Series

How the brain processes risk. An emotional center in the brain, the amygdala, is one of the key regions involved in evaluating risks and making decisions. The area is responsible for triggering feelings of fear by signaling to other brain regions that an outside stimulus — a person, a snake, a news item — may be a potential threat.
