The sound of water inside your walls can come from two major sources: a roof leak or water that comes through the walls themselves. Masonry walls are susceptible to this problem if the mortar between bricks or stones develops small cracks that wind-blown rain can press through.

I Hear Leaking Inside the Walls When It Is Raining | Hunker

Wind Blown Rain Leaks Wind driven rain can also be a major problem. Once again, you could actually have a good roof and wind will drive water up and under your roofing materials. The only lines of defense are tar paper and the ice dam membranes.

Roof Leak - Ten Most Common Leak Locations

Wind-blown rain entering behind any building siding material can become a water problem. In this article series be sure to review J-CHANNEL MISTAKES in Vinyl Siding Cause Costly Building Damage as this is one of the most common causes of leaks around windows and doors of vinyl-sided buildings.

Siding Leak Troubleshooting Diagnose, repair or prevent ...

How To Spot Wind Damage. Roof Leaks: These are perhaps the easiest to find, simply because there is water coming into your house where it shouldn't. Look in your attic or on your top floor for wet spots or water dripping from the ceiling. Be sure to call an expert roofer immediately!

Roof Wind Damage: What it is and How to Spot It

There are a couple of things that can help to reduce the problem. The easiest is to change the exhaust hood for one that has a wind baffle, like in the photo above. If you can't find one like this, just make up a sheet metal shield that will cover the exhaust hood and extend down about two feet on the wall.

How to stop noisy exhaust fan dampers. - Ask Jon Eakes

When the fascia cover is blown off, the ends of the soffit panels are ex- posed to wind and wind-driven rain. The IRC currently has no guidelines for the instal- lation of fascia covers. Aluminum fascia covers are typically tucked under the roof drip edge and face- nailed every few feet.

The third roofer said that the flashing and shingles are fine. The issue is the roof has ridge vents and roof is not steep enough. The wind can blow rain into my roof's ridge vents. He thinks I should get rid of the ridge vents and replace it with box vents, and it would fix the issue. This solution also costs less too.
